SUMMARY

3rd-year Integrated M.Tech (Cyber Security) student (aka Jitish) expected to graduate in 2029. Seeking Software Engineering / Full-Stack internships. Builds React and Node.js apps with REST APIs, JWT authentication, MongoDB/PostgreSQL (SQL), HTML/CSS, and Docker; 300+ competitive programming problems solved across platforms.

SKILLS

- **Languages:** C/C++, Java, Python, JavaScript, SQL, HTML, CSS
- **Frameworks:** React.js, Node.js, Express.js, Tailwind CSS
- **Technologies:** REST APIs, JWT, bcrypt, Full-Stack Development
- **Databases:** MongoDB, PostgreSQL
- **Tools/Platforms:** Docker, Linux, Git, GitHub, Figma, Postman, Firebase, Vercel

EDUCATION

- **Vellore Institute of Technology, Bhopal** Bhopal, India
Integrated M.Tech in Computer Science and Engineering (Cyber Security); CGPA: 8.05 2024 – 2029
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems

EXPERIENCE

- **Google Developer Groups on Campus (GDGC), VIT Bhopal** Bhopal, India
Technical Team Member Dec. 2025 – Sep. 2026
 - **Club Website:** Collaborated in a team to ship the official GDGC VIT Bhopal website – a 9-route React SPA with responsive layouts, deployed on Vercel.
 - **Advitya'26 Event Microsite:** Built the Advitya'26 event microsite end-to-end – parallax landing, countdown timer, 3D gallery and more using React 19, Framer Motion, and GSAP.
 - **Real-time Leaderboard:** Co-developed a real-time leaderboard tracking 20+ competing teams across the Advitya'26 tech fest using Firebase Firestore onSnapshot listeners, enabling live score updates with zero page refreshes.

PROJECTS

- **DSA Practice Platform – Competitive Programming Workspace** [Live Demo](#)
React 19, Node.js, Express 5, MongoDB, JWT, Tailwind CSS, Vite Jul. 2026 – Present
 - **Performance:** Accelerated Codeforces catalog loads from multi-second cold API fetches to CDN edge hits (2h fresh / 6h stale-while-revalidate) by splitting Vercel-CDN vs. browser Cache-Control, disabling Express's auto-ETags, and adding in-memory LRU caching.
 - **Security:** Hardened session and admin APIs against token reuse, timing leaks, and NoSQL injection by shipping JWT access/refresh rotation with HTTP-only cookies, timing-safe admin-secret comparison, slug-validated progress routes, rate limiting, and boot-time secret checks.
 - **Data Model:** Unified fragmented DSA tooling into one practice surface spanning flat and nested sheets (94 patterns, shared progress) via a slug-driven Express/MongoDB API with admin CRUD, cascade deletes, batch moves, and audit logs.
 - **Sync Pipeline:** Kept the archived Codeforces catalog accurate after new rounds by reconciling the problemset against contest standings – pruning graduated problems, importing missing tasks into MongoDB, and retrying failed contests after a 1-hour cooldown.
- **LevelUpSecurity – Cybersecurity Education Platform** [Github](#) | [Live Demo](#)
React 19, Node.js, Express 5, MongoDB, JWT, Tailwind CSS, Vite Sep. 2025 – Nov. 2025
 - **Architecture:** Architected a full-stack cybersecurity education platform with 7 routes and 3 role-based training paths, reducing generic one-size-fits-all training by delivering targeted threat content for Developers, Marketers, and Students.
 - **Backend API:** Built RESTful Express 5 API with JWT authentication using HTTP-only secure cookies (SameSite=None) and bcryptjs password hashing, with endpoints for signup, login, logout, and auto-session restoration on page reload.
 - **Deployment:** Unified Vercel services deployment – Vite frontend and Express backend co-located with path-based /api rewrites – eliminating cross-origin CORS complexity and serving the full stack from a single origin.

ACHIEVEMENTS

- **LeetCode** [Profile](#)
300+ problems solved across arrays, graphs, and dynamic programming; 150+ days daily streak.
- **GeeksForGeeks** [Profile](#)
Completed the 160 Days DSA Challenge in C++ algorithms and data structures.
- **Cisco CCNA (200-301) Training** May 2026 – Aug. 2026
NetworkChuck Academy | Jeremy Cioara | Chuck Keith

CERTIFICATIONS

- **The Bits and Bytes of Computer Networking** Jul. 2026
Google IT Support Professional Certificate | Coursera
- **Mastering Data Structures & Algorithms using C and C++** Dec. 2025
Udemy | Dr. Abdul Bari
